used in undergraduate classrooms across the usa this is a clearly written rigorous introduction to differential equations and their applications fully understandable to students who have had one year of calculus this book distinguishes itself from other differential equations texts through its engaging application of the subject matter to interesting

scenarios this fourth edition incorporates earlier introductory material on bifurcation theory and adds a new chapter on Sturm-Liouville boundary value problems. Computer programs in C, Pascal, and Fortran are presented throughout the text to show readers how to apply differential equations towards quantitative problems.

includes part 1 number 2 books and pamphlets including serials and contributions to periodicals

How do I plan my course? How can I inspire students? How do I present myself? How do I want to teach? How do I test correctly? What teaching methods are there? Due to the lack of comprehensive university didactic training, teachers too often have to answer these and many other questions for themselves. This book is intended to counteract this and presents practical tips on good university teaching for all disciplines based on the current state of research.

Neuropsychological and psychosocial foundations of neuro-oncology provides an in-depth review of common cognitive, psychological, and social manifestations that occur in patients with brain cancer and other neuro-oncological issues. Chapters discuss primary CNS tumors, brain metastases, leptomeningeal disease, paraneoplastic disorders, and many other topics. Effects of CNS and systemic cancer treatment, i.e., radiotherapy, chemotherapy, immunotherapy, are also examined, as well as current practices for rehabilitation and targets for essential future interventions in vulnerable populations. This book is fully illustrated with pathology photomicrographs, CT and MRI images, tables, and molecular pathway diagrams, bringing neuropsychological and behavioral health care knowledge from the bench to the bedside. This volume is an essential reference for practicing neuro-oncologists, neuropsychologists, nurses, and others working in the field of neuro-oncology. It discusses the neurocognitive implications of brain and systemic cancer treatments, examines the foundations of neuropsychological testing and daily life implications, including caregiver support, covers the psychosocial implications of brain cancer, psychotherapeutic interventions, and cognitive rehabilitation.

This book shall assist the microscopist in a practical way with the help of three mainstays: a) clinical information, b) the resources a standard histopathology laboratory may offer, and c) the light microscope to approach and solve the diagnostic problems he/she may face in the field of dermatopathology. In fact, this is the way in which the senior author of this book has been successfully working over thirty years in his capacity as director of a private dermatopathology laboratory.
